Lecture 6

Dec 5th

POTD: DHH

Goal: Create a rails playlister app. This will be what we add to for most of the rest of the course. By the end of the day we should have Artists and Songs and we can add Artists to songs through the new Song form. We'll have model and controller tests to boot.

Topics:

Migrations
ActiveRecord (CRUD, Querying)
model specs
controller specs
has_many / belongs_to
form_tag vs form_for
custom reader / writers
"Skinny Controllers" (Default Controller Patterns)
Validations / Form Errors (AR Error Objects)

has_many through

HW: Implement Genres for Songs
songs belong_to genre
genre has_many songs
Try to write tests
